Summary

Adedicated front-end developer with hands-on experience in HTML, CSS, JavaScript, React, and TypeScript. Excels in both solo and team-based projects, with a focus on developing landing pages and web applications. Passionate about delivering responsive and engaging digital experiences tailored to modern web standards.

Experience

West African Center for Counter-Extremism — September 5th 2024 - September 7th 2024, Tamale
Volunteer

- Demonstrated teamwork, project management, and dedication to making a positive impact in the community.
- Participated in a community outreach project involving painting a school building.
- Gained experience in collaborating with diverse teams and contributing to a shared goal.

Education

University of Ghana — January 2022 - Present
Information Technology — Bachelor of Science
https://www.ug.edu.gh/

Projects

usePopcorn — July 2024

usePopcorn is a sleek and user-friendly React application that allows users to search for any movie and access detailed information, including IMDb ratings, plots, released year and much more. Additionally, users can rate movies based on their personal viewing experiences.

worldWise — August 2024

World Wise is a React application that provides a global map for users to explore. Users can mark places they have visited and write notes about their experiences.

Volunteering

West African Center for Counter-Extremism — September 5th 2024 - September 7th 2024, Tamale, Ghana
Volunteer

Volunteered with the West African Center for Counter-Extremism, contributing to a community project by painting a school building and clinic. This experience showcased my commitment to community service, teamwork, and project management skills. I collaborated effectively with others to achieve a shared goal, demonstrating dedication and organizational abilities.
